QUICKLIME APPLICATION

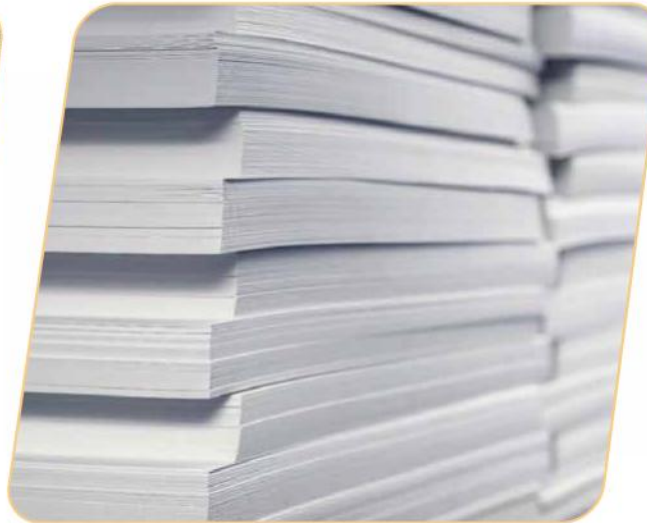

NGT
NEW GLOBAL TRADING

- Quicklime is a material with a variety of uses in the steel, paper and sugar industry around the globe.

STEEL

In the blast furnace, Our Quicklime is used to process iron into steel. It is also used as a fluxing agent in furnaces where it fuses with impurities to form slag which is then removed to improve the quality of the steel.

PAPER

Our quicklime when mixed with water forms Slaked Lime which reacts with Sodium Carbonate to produce Caustic Soda that is the main ingredient to dissolve Lignin make pulp.

SUGAR

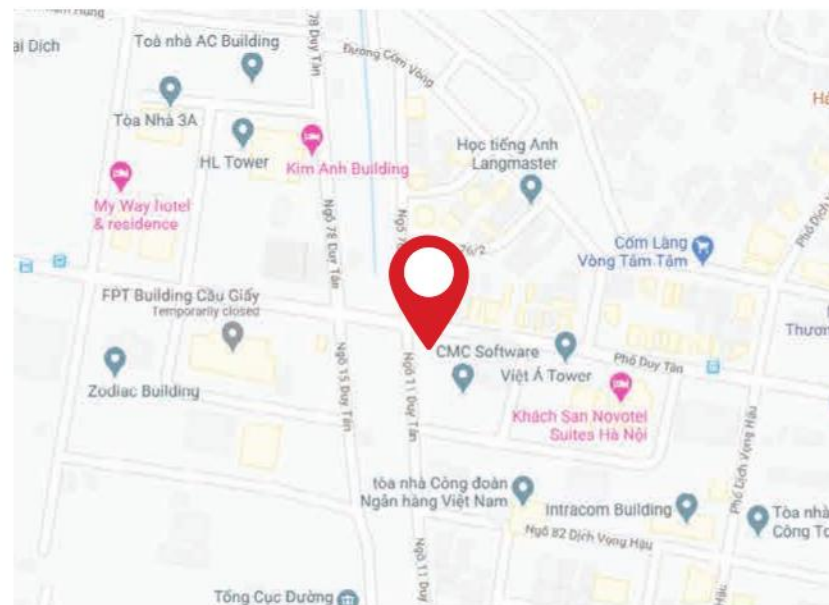

Our quicklime is mixed with water to form slaked lime which then increases the PH of raw Sugar and remove impurities; therefore, refining the sugar in to higher purity.
